

PAC is the leading European research and consulting firm in the fields of digital transformation, software, and IT services. We are a content-based company with strong consulting DNA. With more than 40 years of experience, and operating out of four countries, we are the preferred partner for European user companies to define their IT strategy, govern teams and projects, and de-risk technology choices that drive successful business transformation.

We are hiring a Data Analyst (m/f/d)

PAC in Romania has an open position for an English-speaking Data Analyst, with a focus on available information research related to technology and macroeconomic topics. This is a multi-tasking role for a highly organized person with excellent computer operation skills (incl. advanced Excel knowledge and experience, Google search, Office365, and Cloud storage platforms). The successful candidate should be proactive, figures-oriented, have a keen eye for detail, and be equipped with patience and goodwill for growing.

Your responsibilities:

- Acquiring data from primary or secondary data sources
- Maintaining databases with quantitative and qualitative information
- Support our consultants and the Management in the evaluation of the market and company information gathering for the purpose of creating reports and executing projects.
- Create templates for research tools and process the gained information in the form of diagrams and tables.
- Design and prepare final deliverables for figures-based projects and documents needed for our SITSi® Market Research Program
- Developing and implementing data analyses, data collection systems and other strategies that optimize statistical efficiency, quantitatively and qualitatively
- Integrate graphics into various PPT presentations and Word documents
- Identify, analyze, and interpret trends or patterns in complex data sets
- Work with the management to prioritize business and information needs
- Locate and define new process improvement opportunities

What's on offer?

- A great opportunity to expand your network with some of the largest IT service and software providers in the world.
- A diverse and responsible position in a very dynamic environment: You are responsible for complex and exciting tasks and have the opportunity to realize your creative ideas.
- A team full of energy, with a flat hierarchy and open culture, easy cooperation, and a commitment to mutual success.
- You will be given a permanent employment contract, as we value long-term cooperation with our employees.

Your skills:

- Language skills: English – advanced, mandatory; German/French would be a big plus
- Degree in Mathematics, Statistics or Engineering
- Strong analytical skills with the ability to collect, organize, analyze, and disseminate significant amounts of information with attention to detail and accuracy
- Proactive and dynamic
- High affinity for IT tools, distinct willingness to learn, and proactive approach
- You are eager for knowledge and open to new and innovative projects
- High affinity for data and figures
- Proficiency with Microsoft Office products, especially Excel, is a precondition.

Nice to have:

- Knowledge of statistics and experience using statistical packages for analyzing datasets
- 2+ years of relevant professional experience in quantitative analysis

Interested?

If you would like to apply or if you have any questions, please contact Stefania Danciuc (sdanciuc@teknowlogy.com).

Please send us your CV with the subject “Data Analyst”, stating your earliest start date at info-romania@teknowlogy.com.

Feel free to add a short cover letter to explain why you are applying (not compulsory)
